### Why Invest in this fund?

 Seeks to provide long-term capital appreciation by investing primarily in growth stocks domiciled in the US.

 Access a range of companies at different stages of a company's life cycle from small, mid-sized to mature companies.

Aims to capture growth at different stages of a company's life cycle.

### Risk Tolerance

LOW	MEDIUM	HIGH

**Putnam Investments** 

Richard Bodzy, Gregory D. McCullough

\* Effective June 1, 2022, the redemption charge purchase option, and the low-load purchase option are no longer available for purchase, including those made through systematic purchase plans such as preauthorized contribution plans. Switching from securities of a Mackenzie Fund previously purchased under the redemption charge or low-load purchase options to securities of another Mackenzie Fund, under the same purchase option, will continue to be available until such redemption schedules expire.

" The Russell 3000 Growth Index measures the performance of those companies in the Russell 3000 Index with higher price-to-book ratios and higher forecasted growth values. Russell 3000 Index is constructed to provide a comprehensive, unbiased, stable barometer of the broad growth market. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

\*\*\* The major holdings of the Fund may, but do not necessarily, represent the largest holdings of the Fund. Rather, the major holdings are selected for their overall significance in evaluating the investment portfolio. \* Commissions, trailing commissions, management fees, and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return the historical annual compounded total returns as of July 31, 2024 including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution, or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Standard deviation provides a measure of the variability of returns that have occurred relative to the average return. The higher the standard deviation, the greater is the range of returns that has been experienced. Standard deviation is commonly used as a measure of risk.
