#### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2024

## **Management Discussion of Fund Performance**

June 4, 2024

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the year ended March 31, 2024 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read A Note on Forward-Looking Statements on the first page of this document.

Investors holding securities of Mackenzie Ivy International Class were merged into the corresponding series of the Fund on a tax-deferred basis on July 30, 2021. Consequently the information in this report is presented as if the Fund had existed since the inception of Mackenzie Ivy International Class.

The Fund is closed to new sales.

## **Investment Objective and Strategies**

The Fund seeks long-term capital growth, while trying to preserve its capital, by investing primarily in equities of companies located in the following three principal market regions: (i) Europe and the United Kingdom; (ii) Australia and New Zealand; and (iii) Asia and the Far East.

### Risk

The risks of the Fund remain as discussed in the Fund's most recent Simplified Prospectus.

The Fund is suitable for medium- to long-term investors looking for an international equity fund to hold as part of their portfolio, who can handle the volatility of stock markets and who have a low to medium tolerance for risk.

### Results of Operations

### **Investment Performance**

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

During the period, the Fund's Series A securities returned 6.4% (after deducting fees and expenses paid by the series). This compares with the MSCI EAFE (Net) Index return of 15.3%. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

European equities rose over the period. Investors began to anticipate a shift in central bank policy late in the period as inflationary pressures eased. In March 2024, the European Central Bank decided to maintain its key interest rate. The change in investor sentiment led to a rally in higher-risk equities. Japanese stocks posted substantial gains as strong exports supported economic growth, although currency movements reduced returns for Canadian investors.

Within the MSCI EAFE (Net) Index, Italy, Denmark and Japan were the strongestperforming markets in Canadian dollar terms, while Hong Kong, Portugal and Finland were the weakest. The information technology, financials and industrials sectors were the strongest performers, while consumer staples, utilities and communication services were the weakest.

The Fund underperformed the index, with an underweight position and stock selection in Japan, stock selection in Switzerland and the Netherlands and holdings in the United States detracting from performance. In sector terms, an overweight position and stock selection in consumer staples detracted from performance, as did stock selection in industrials.

Conversely, stock selection in Germany and the United Kingdom contributed to performance. In sector terms, lack of exposure to utilities and stock selection in financials contributed to performance.

Over the period, the Fund's exposure to Japan increased, and exposure to Denmark was introduced. Exposure to the United Kingdom decreased. Exposure to the health care sector increased, while exposure to the industrials sector decreased. These changes were a result of the portfolio management team's bottom-up investment approach, as the team continually assessed the Fund's holdings and found opportunities among high-quality companies with strong risk-reward and valuation profiles. Changes to the portfolio included new positions in Carlsberg AS, Merck KGaA and Assa Abloy AB, and the elimination of the positions in CK Hutchison Holdings Ltd. and Diageo PLC.

#### **Net Assets**

The Fund's net assets decreased by 13.4% during the period to \$15.2 million. This change was composed primarily of \$1.0 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and a decrease of \$3.3 million due to net securityholder activity (including sales, redemptions and cash distributions).

#### **Fees and Expenses**

The management expense ratio ("MER") for each series during the year ended March 31, 2024, was generally similar to the MER for the year ended March 31, 2023. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

## Recent Developments

In the portfolio management team's view, some of the risks that marked the period remain a source of uncertainty, including higher interest rates than in recent history, inflationary pressures and concerns about a recession. Rather than positioning the Fund for a specific macroeconomic outcome, the team focuses on the long-term prospects of existing and potential investments and views price declines as potential buying opportunities. The Fund targets high-quality companies with proven business models and strong balance sheets that, in the team's view, can better withstand adverse market environments. The team also seeks to strike a balance between short-term protection and long-term returns.

## Related Party Transactions

#### **Management and Administration Services**

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

### **Other Related Party Transactions**

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions in the period.

### **Past Performance**

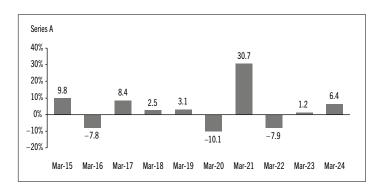

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

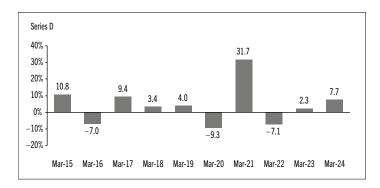

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

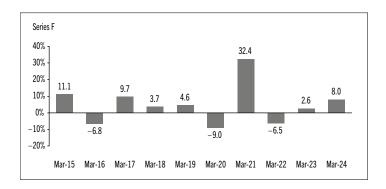

The past performance before July 30, 2021, is based on the performance of the applicable series of Mackenzie Ivy International Class, which was merged into the corresponding series of the Fund on that date.

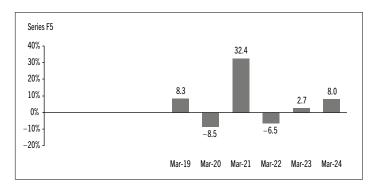

## Year-by-Year Returns

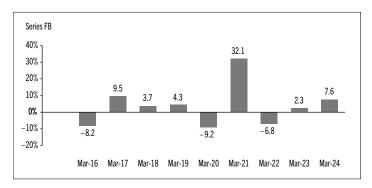

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

## **Annual Compound Returns**

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2024. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

The MSCI EAFE (Net) Index represents large- and mid-cap equity performance across 21 developed markets, excluding the United States and Canada. Net total returns are calculated after the deduction of withholding tax from the foreign income and dividends of its constituents.

The percentage return differs for each series because the management fee rate and expenses differ for each series.

<sup>(2)</sup> The return since inception for each series will differ when the inception date differs and is only provided when a series has been active for a period of less than 10 years.

<sup>(3)</sup> The return of the MSCI EAFE (Net) Index since inception for each applicable series is as follows: Series F5 8.5%, Series FB 6.5%, Series PWFB 6.9%, Series PWT8 6.4%.

This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the Notes to Financial Statements.
- (2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.
- (3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with the Manager may be entitled to distributionrelated payments from the Manager on the same basis as unrelated registered brokers and dealers: Investors Group Securities Inc. and Investors Group Financial Services Inc.

The Manager used approximately 42% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 43% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series. The higher proportion of distribution-related payments is primarily attributable to sales commissions related to gross sales of redemption charge securities of the Fund.
